

I was so glad when XM Satellite radio began offering traffic and weather information for it's listeners. We travel quite a lot and really appreciate being able to get instant reports about what's going on in areas we will be going through each day.

Many times, the only stations you can get are AM and very weak, full of static, etc. XM comes in clear at all times. Please don't allow anyone to cause us to lose out on this great public service . Thank you.
